CREATIVITY, MIND MAPPING, HUMOR AND BRAIN-BODY CONNECTIONS

Experience a 3 day workshop that will develop your creativity and enhance your teaching. Patricia Rose Upczak’s workshops cover unique techniques that will guide the participants to a whole new perspective and a multidimensional way of teaching and dealing with the educational world. She promotes happiness as serious business both for the teacher and the student. Her workshops explore lateral thinking, modality strengths, learning styles, creativity, NLP, and the brain-body connections as it can be used for both teachers and their students in the real climate of education today.

Her philosophy is reflected by the following quote “The teacher as a person is more important than the teacher as a technician. What he (or she) is has more effect than anything he (or she) does.”

Jack Canfield

For more information on Patricia’s background please go to www.happyteachershappystudents.com

Space is limited and it will fill up fast.
