ADVISORY COMMITTEES TO THE BOARD

Since the Board wishes to encourage the widespread participation of all interested groups in school policymaking, a variety of advisory committees are formed to secure the contributions of these groups towards improving the instructional program.

Such committees, under the direction of the Superintendent, make thorough studies of the subjects assigned them, and submit their findings and recommendations to the Board through the Superintendent. However, the legal responsibility for decisionmaking in all matters of policy and operation rests with the Board of Education.

School- and District-level advisory committees that are required by federal or state law shall be formed and shall function in accordance with the requirements of federal or state law. Such committees include the District Accountability Committee, School Advisory Councils, and the following:

- 1. Advisory School District Personnel Performance Evaluation Council.** The Board shall appoint an advisory District personnel performance evaluation council which shall perform such duties as are required by law or designated by the Board and which shall, at a minimum, consist of one teacher, one administrator, one principal, one parent of a child enrolled in the District, and one patron (person who does not have a child in school).
- 2. Vocational Advisory Council and Program Committees.** The Board shall appoint a vocational advisory council which shall assist the Board in overall promotion, planning, coordination, and evaluation of all District vocational education programs. The Board shall also appoint a technical advisory committee for each vocational educational program provided by the District.
- 3. Drug Abuse Education and Prevention Advisory Council.** In accordance with federal law and as a recipient of funding under the Drug-Free Schools and Communities Act, the Board shall appoint a District drug abuse and education advisory council. To the extent possible, the council shall consist of representatives of local government, business, parents, students, teachers, pupil services personnel, appropriate state agencies, private schools, the medical profession, law enforcement, community-based organizations, and other groups with interest and expertise in drug and violence prevention. One individual may represent more than one of these groups.
